NOTE 10 – FAIR VALUE

FASB ASC 820 defines fair value, establishes a framework for measuring fair value, and establishes a fair value hierarchy which prioritizes the inputs to valuation techniques. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market. Valuation techniques that are consistent with the market income or cost approach, as specified by FASB ASC 820, are used to measure fair value.

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities the Company has the ability to access.

Level 2 inputs are inputs (other than quoted prices included within level 1) that are observable for the asset or liability, either directly or indirectly.

Level 3 are unobservable inputs for the asset or liability and rely on management's own assumption about the assumptions that market participants would use in pricing the asset or liability. (The unobservable inputs should be developed based on the best information available in the circumstances and may include the Company's own data.)

A qualifying asset or liability's level within the framework is based upon the lowest level of any input that is significant to the fair value measurement. The Company's qualifying assets or liabilities are recorded at fair value using Level 1 inputs.

NOTE 11 – UNCERTAINTY IN INCOME TAXES

Effective January 1, 2009, the Company adopted ASC Topic 740-10 Accounting for Uncertainty in Income Taxes, which required the Company to report any uncertain tax positions and to adjust its financial statements for the impact thereof. As of December 31, 2017, the Company determined that it had no tax positions that did not meet the "more likely than not" threshold of being sustained by the applicable tax authority. The Company files taxes and information returns in the United States Federal and Massachusetts state jurisdictions. These returns are generally subject to examination by the authorities for the last three years.

NOTE 12 – LITIGATION

During 2017 the Company was a party to legal proceedings incidental to its business. Currently only one claim is pending. Although the ultimate result of legal proceedings cannot be predicted with certainty, it is the opinion of the Company's management that the outcome of the remaining claim will not have a material effect on the financial position of the Company, its cash flows and result of operations.

NOTE 13 – SUBSEQUENT EVENTS

Management has evaluated subsequent events through February 13, 2018, the date on which the financial statements were available to be issued. There were no subsequent events that require adjustment or disclosure in the financial statements.
